

Assignment-1 Create a dashboard which lets you check the CPU utilization and networking for a particular EC2 instance.

The first screenshot shows the AWS CloudWatch Dashboards page in the us-east-1 region. It displays a table with one custom dashboard named 'Assignment-Dashboard', created on 2023-10-28 at 13:03. The dashboard is currently in a 'Draft' state.

The second screenshot shows the configuration page for the 'Assignment-Dashboard'. It displays three widgets:

- CPUUtilization, Networkin**: A line graph showing CPU utilization for instance `i-0739e382deaa0572d` (webserver) and network in for instance `i-0c5e8b71ac0a9bc6b`. The current values are 4.19 kB and 0.33%.
- CPUUtilization**: A line graph showing CPU utilization for instance `i-0739e382deaa0572d` (webserver).

The dashboard is currently in a 'Draft' state, and the 'Save' button is visible.

Step 1: Creation of cloudwatch dashbord
