

Project You work for XYZ Corporation. Your corporation is working on an application and they require secured web servers on Linux to launch the application.

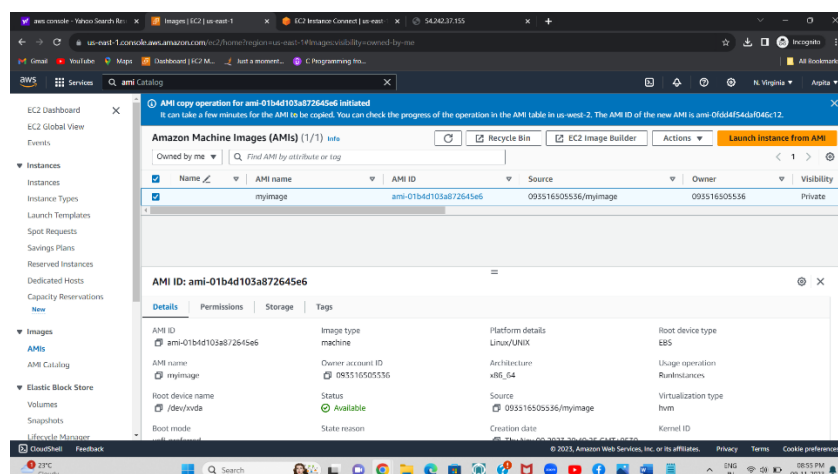

1. Create an instance in the US-East-1 (N. Virginia) region with Linux OS and manage the requirement of web servers of your company using AMI.

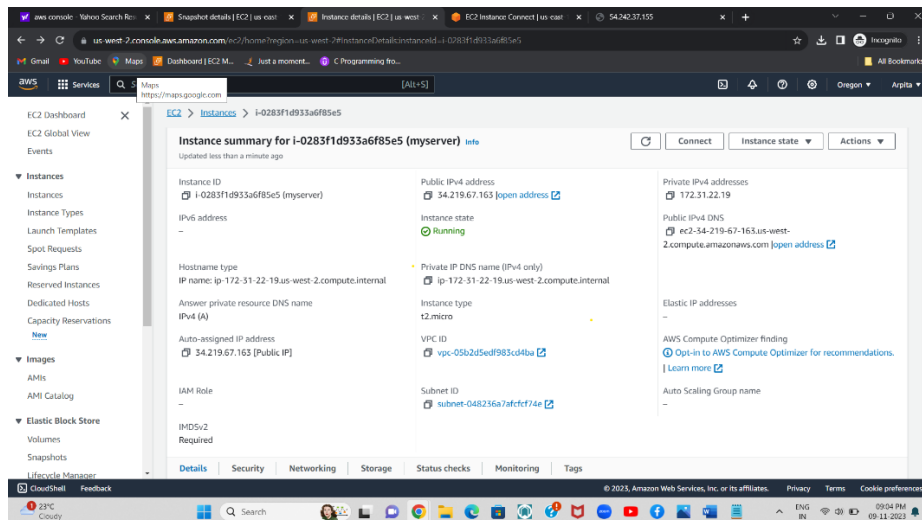

It works!

2. Replicate the instance in the US-West-2 (Oregon) region.

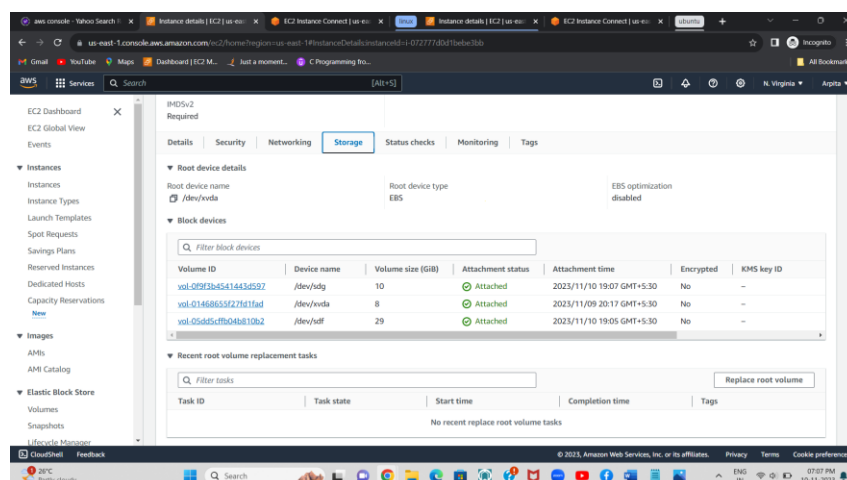

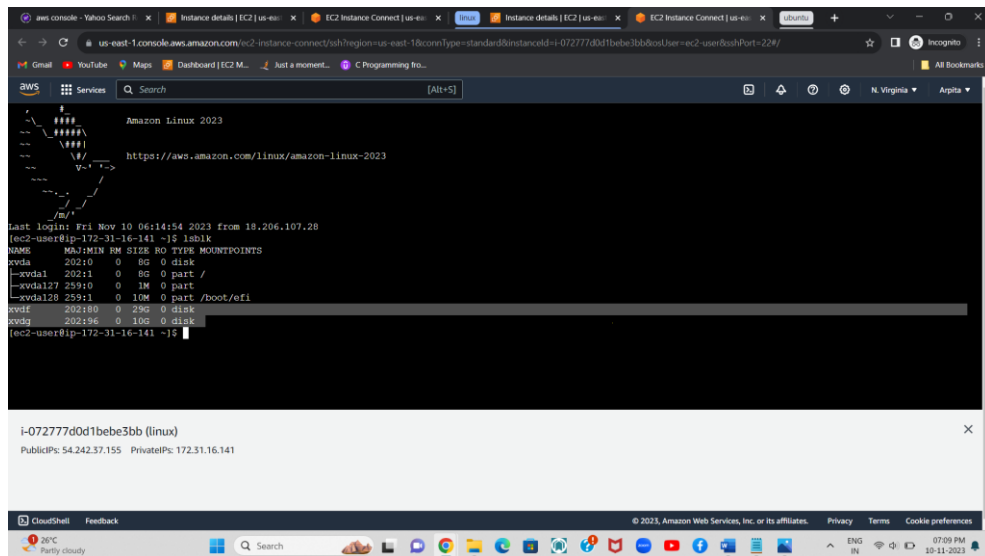

It works!

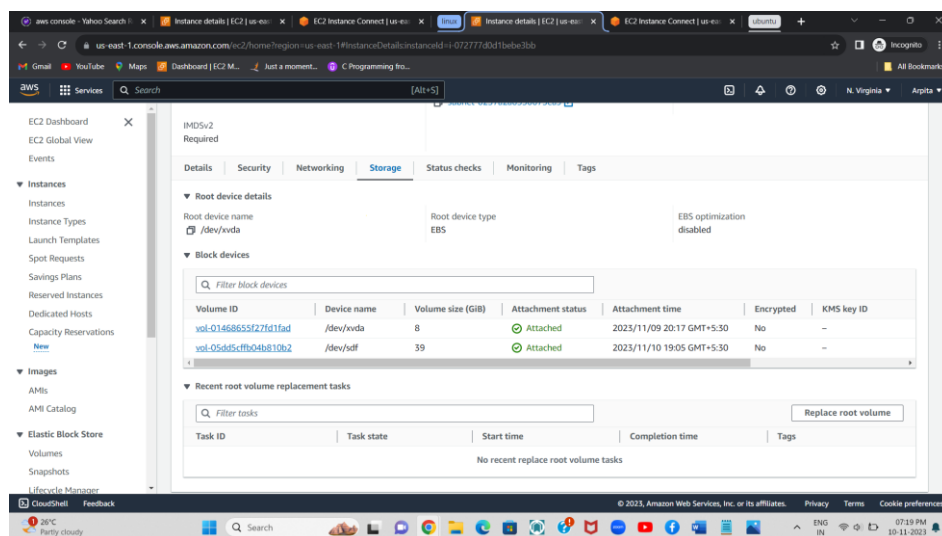

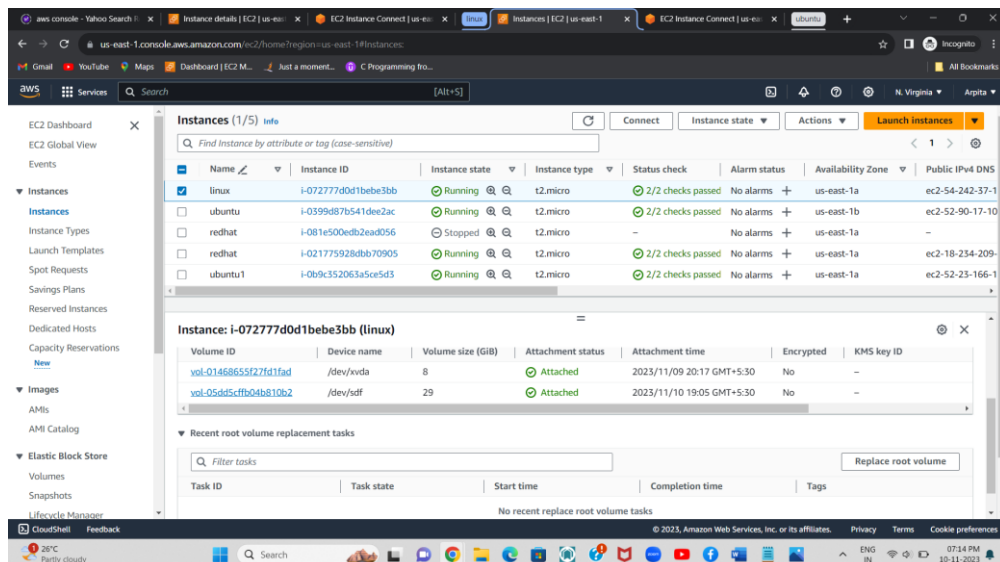

3. Build two EBS volumes and attach them to the instance in the US-East-1 (N. Virginia) region.

4. Delete one volume after detaching it and extend the size of the other volume.

5. Take backup of this EBS volume
