

Assignment-3 You work for XYZ Corporation. Their application requires a storage service that can store files and publicly share them if required. Implement S3 for the same.

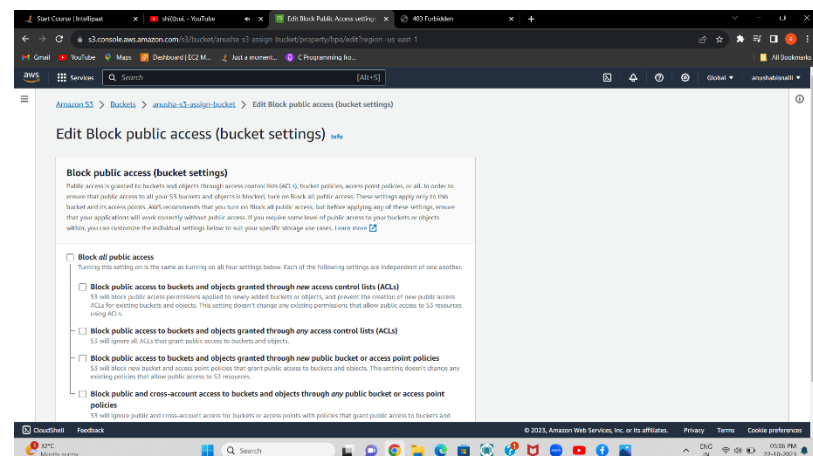

1. Use the created bucket in the previous task to host static websites, upload an index.html file and error.html page.

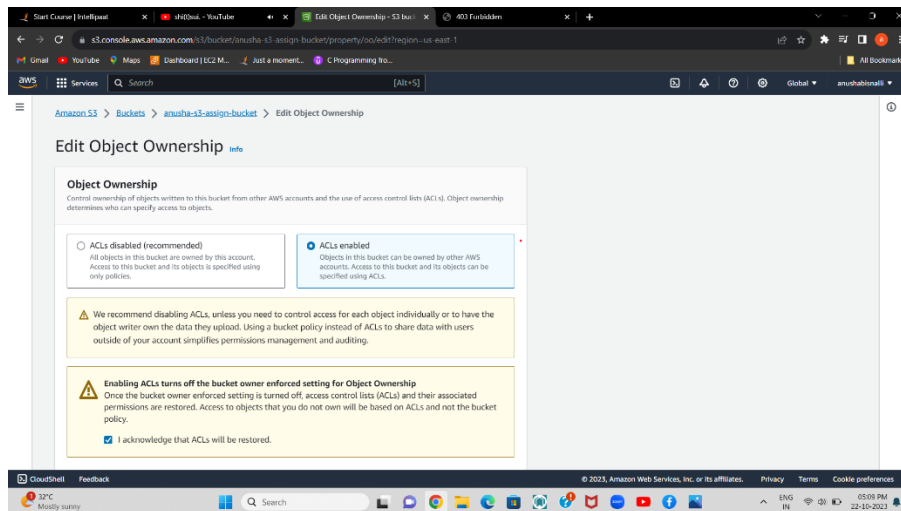

Step 1: Upload index.html & error.html to bucket.

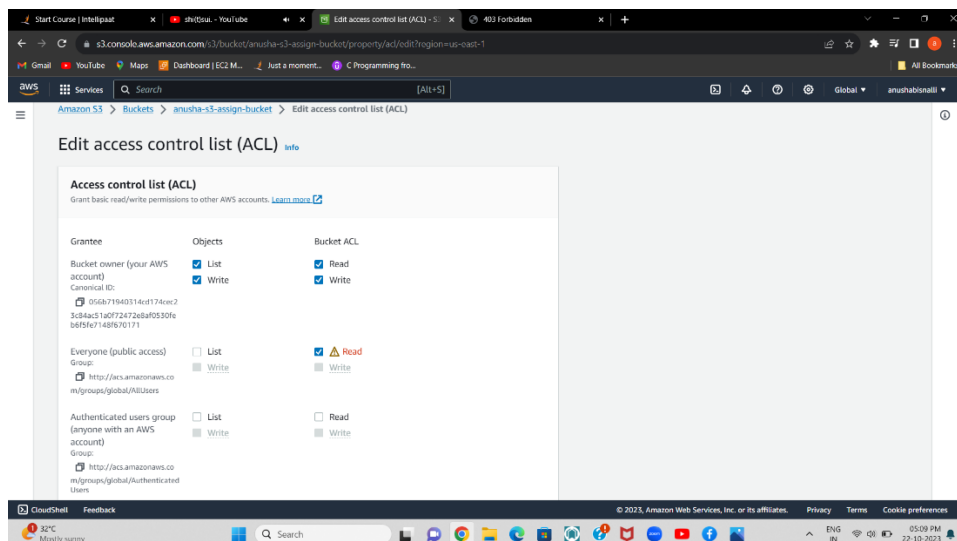

Step 2: Enable static website hosting.

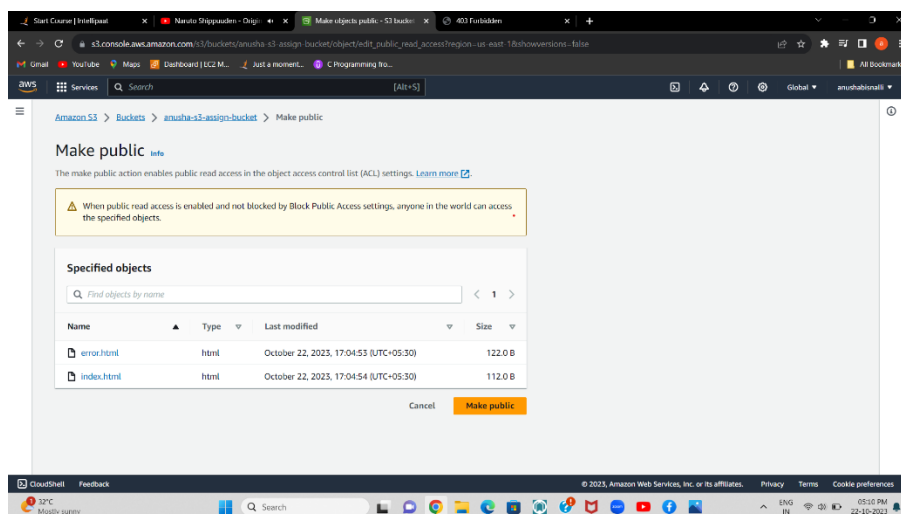

Step 3: Unblock public access

Step 4: Enable ACLs

Step 5: Give read access

Step 6: Make index.html & error.html public.

This is main page. Index

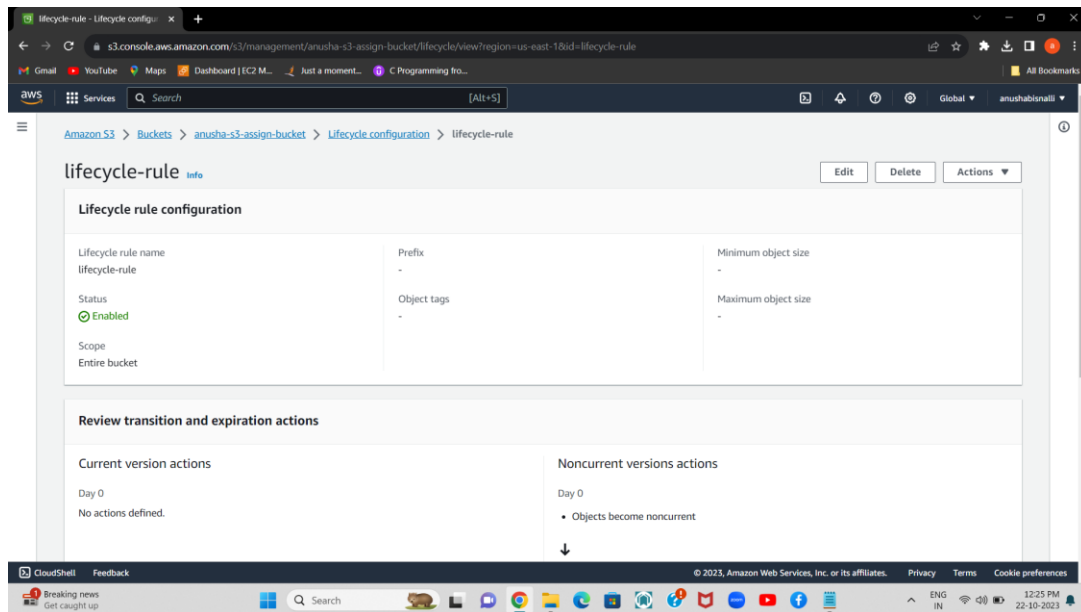

Step 7: Now host the website

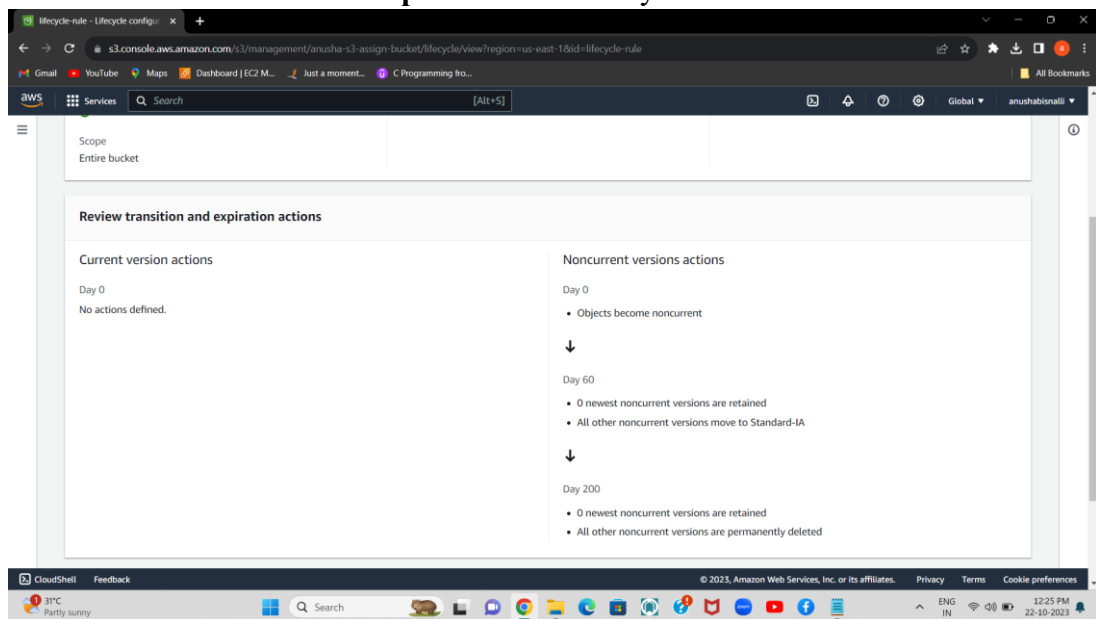

This is error page. Page Not Found.

Step 8: If the link is wrong error.html is found

2. Add a lifecycle rule for the bucket: a. Transition from Standard to Standard-IA in 60 days b. Expiration in 200 days

Step 1: Create a life cycle rule

Step 2: Transition from Standard to Standard-IA in 60 days , Expiration in 200 days.
